

## PREACHER'S JAFAR JET

He has been a real friend and companion to me, and taught me to trust him, thank goodness he has such a good nature and a lot of patience, when I didn't.

He was born on June 18 at my place here, when his Mom was 21, and what a cutie he was. Now he's 11 and we have been together every day of his life, we are very bonded. He has always been an easy going, willing, and even tempered guy, and a bit of a clown. He has really taken care of me in spite of myself.

He has over 2000 miles, and we have been competing since he was 4, with only 1 pull. I fear saying that as it may jinx us, but he is steady and true. We have always done limited distance, although we started in competitive, but switched to LD when that was offered because of his size. We have overcome an ear infection, which left him weak on the right side, he did have some paralysis on the right side of his head, in his ear and lip. The lip still droops, but it only adds to his appeal, and after 2 years he going straighter then he ever did.

He is quite a guy, not just a horse, but a real "buddy" we understand each other, I hope I have many, many more years with him. Thank you Preacher.
